

### Andrews Pharmacy Travel Health and Vaccination Service

Thanks for your email enquiring about our Travel Health and Vaccination service.

We offer a full range of **travel vaccinations** and **anti-malaria** tablets for all destinations.

To give you the most accurate advice we need to gather some information about you, your **previous vaccinations, health, and travel itinerary**.

We have **several** methods you can do this:

1. Click on the link below to take you to the **Pharmadoctor** e-consult Travel Service pre-screening page.  
<https://pharmadoctor.co.uk/patient/locations/north-west/stockport/Andrews-Pharmacy-Ltd-SK103DE-2278>

#### **What is Pharmadoctor?**

We've partnered with Pharmadoctor to support our service as a way to complete our pre-consultation questionnaire online. You will need to register your details to complete our pre-consultation questionnaire.

How does it all work?

#### **Start your e-consultation.**

After clicking the button, you will be directed to our partner, Pharmadoctor, where you will need to register before completing your e-consultation. Once completed, select "book appointment" to continue.

#### **Book your appointment.**

Simply select your preferred date and time. You will then receive an email confirmation to confirm your booking.

#### **Attend your appointment.**

Your consultation can take up to 20 minutes – our pharmacist will provide advice of the vaccinations recommended so you can make an informed choice.

#### **Start your treatment.**

If the vaccines are available in our pharmacy, you may start your vaccine plan there and then. Some vaccines that have more than one dose so you may need to come back for further appointments. Please note, all vaccines are subject to availability.

2. Visit the **Travel Health** section of our website for more information and download the forms  
<https://andrewspharmacy.co.uk/travel-medicine>
3. Download the Word format of the **Travel Consultation pre-screening** form [Travel Consultation Form Here](#), fill it in on your device or PC and email it back to us at [pharmacy.FH709@nhs.net](mailto:pharmacy.FH709@nhs.net)
4. Download and print off a copy of the **Travel Consultation pre-screening** PDF form [Travel Consultation Form PDF Here](#), fill it in with a pen, scan or take a photo of the pages and email it back to [pharmacy.FH709@nhs.net](mailto:pharmacy.FH709@nhs.net)
5. You can also pop into the pharmacy and pick up a travel consultation form or phone us for advice on **01625 618481**

When we have received your information, we can then advise on the recommended vaccinations for your travel and arrange a convenient appointment.

We would also recommend looking up your destination on the travel health pro website.  
<https://travelhealthpro.org.uk>

This will give you an idea of what vaccines and anti-malarial medication is recommended for your destination and some useful travel health advice.

If you are travelling to an area that requires Yellow fever vaccination, there is an additional **Yellow Fever checklist** we would ask you to complete the [Yellow Fever Checklist](#) here.

### FAQ

### FAQ

What Vaccinations are free on the NHS?

The following travel vaccines are available free on the NHS if your GP practice is signed up to provide vaccination (immunisation) services.

- \* polio (given as a combined diphtheria/tetanus/polio jab)
- \* typhoid
- \* hepatitis A
- \* cholera

These vaccines are free because they protect against diseases thought to represent the greatest risk to public health if they were brought into the country.

Travel vaccinations - NHS <https://www.nhs.uk/conditions/travel-vaccinations/>

### FAQ

When Should I Have My Vaccines?

Ideally you should start your travel vaccination programme at least six weeks before departure, or earlier if possible.

By allowing 4-6 weeks for your vaccination programme, you have time to fit in full courses of vaccines where required which provides you with the best possible protection against certain vaccine preventable diseases. Even if you don't have time to complete the course before you travel, it is better to start and then complete when you get back. At least four to six weeks before you go. This gives you time to check that your routine UK vaccines are up to date and get any recommended travel vaccines and malaria tablets.
